TO BE COMPLETED BY FUNERAL DIRECTOR

TO BE COMPLETED BY PHYSICIAN: MEDICAL CERTIFICATION

BALTIMORE, MARYLAND 21215-0020

DIVISION OF VITAL RECORDS, P.O. BOX 68760,

TO THE HOSPITAL OR ATTENDING PHYSICIAN: The law requires that the death certificate be executed within 72 hours after death. Page 6 may be retained by the hospital or attending physician.

TO THE FUNERAL DIRECTOR: After this certificate has been signed by the attending physician and completely filled in by the funeral director, page 5 should be detached for use as the burial-transit permit. Pages 1, 2, 3 should be filed within 72 hours after death with the State Dept. of Health and Mental Hygiene prior to burial, cremation, or removal.

IMPORTANT: If item 28 is marked, or item 23 shows any injury, or other traumatic event, the medical examiner must be notified at once.

The first part of the paper is devoted to a discussion of the
 general principles of the theory of the structure of the
 crystal lattice. It is shown that the structure of the
 crystal lattice is determined by the balance of the
 forces of attraction and repulsion between the atoms.
 The forces of attraction are due to the electrostatic
 interaction between the positive and negative ions,
 while the forces of repulsion are due to the overlap
 of the electron shells of the atoms. The balance of
 these forces determines the equilibrium distance
 between the atoms, which is the lattice constant.
 The lattice constant is a function of the temperature
 and the pressure, and it varies with the nature of
 the crystal. The lattice constant is also a function
 of the direction in the crystal, and this is the
 cause of the anisotropy of the properties of the
 crystal. The anisotropy of the properties of the
 crystal is a direct consequence of the anisotropy
 of the structure of the crystal lattice. The
 structure of the crystal lattice is the basis of
 all the properties of the crystal, and it is the
 study of the structure of the crystal lattice that
 forms the basis of the theory of the properties of
 the crystal.

THEORY OF THE EARTH

CHAPTER I. OF THE ORIGIN OF THE EARTH.

SECTION I. OF THE ORIGIN OF THE EARTH.

THE EARTH, as we see it, is a globe, or a sphere, of a very great magnitude. It is composed of a solid mass of matter, which is divided into several parts, or regions, by the action of fire, water, and air. The parts are the solid, the liquid, and the gaseous. The solid is the earth, the liquid is the water, and the gaseous is the air. The earth is the most extensive of the three, and is the only one which is capable of supporting life. The water is the next in extent, and is the only one which is capable of supporting life. The air is the least in extent, and is the only one which is capable of supporting life.
